Hello to everyone:

Waiting for additional covering, so I can finish the T-28. Looks pretty good so far. I refurbished a Japanese Val Dive Bomber, so all we need is springtime and no rain!

See you later
Joe

Thank you to Patrick Ehlen for filling the Treasurer position!

Dear Model Aviation Enthusiast,
The Political Action Committee (PAC) for Model Aviation just launched to fight against burdensome laws and regulations that Congress and the FAA keep imposing on our hobby. PACs are organized for the purpose of raising and spending money to elect and defeat candidates based on their agenda. They are able to dedicate resources towards the shaping of legislation and regulations that many nonprofit organizations cannot. The PAC for Model Aviation is committed to the protection of the recreational model aircraft hobby. The Committee will inform candidates about public policy issues related to the hobby and support those who are dedicated to reducing the heavily burdensome regulations being implemented. Upcoming recreational testing requirements, the FAA's proposed rule on remote ID, and extreme airspace restrictions across the country are taking the enjoyment from our favorite pastime. Model aviation has been the steppingstone to full scale aviation and aeronautical careers for decades. Unfortunately, what has been a decades long hobby to many, is now facing government overreach without any safety justification. The time has come for the model aviation community to fight back against government bureaucracy and cumbersome FAA regulations. The future of model aviation is at stake, act now before its too late. Visit modelaviationpac.com for more information about the PAC for Model Aviation. Please forward this email to all of your friends who are passionate about saving model aviation.

Sincerely,
PAC for Model Aviation Board
